Hiroshima J. M. Sci.

CONTENTS

Vol. 27, No. 1, March, 1978

H. Fukuchi, M. Yoshida, M. Kumagai, T. Kitaura, I. Takahashi, T. Shimada and I. Kobayashi. A comparative study on the methods of quantitative analysis of sodium cephalothin. 1-7

H. Fukuchi, M. Yoshida, M. Kumagai and T. Kitaura. A study on intravenous admixtures. —Stability of sodium cephalothin in large volume parenteral solutions—. 9-14

Y. Kodomari, O. Nishida, M. Kambe, T. Kuraoka, T. Okamoto, H. Kawane, Y. Aratani, T. Hiramoto, K. Arita and Y. Nishimoto. Investigation on phase IV in lateral position. 15-22

K. Takanaka and T. Usui. Production of superoxide anion by NAD(p)H oxidase: lack of the oxidase activity in swollen leukocytes of CGD (chronic granulomatous disease). 23-29

Y. Shiba, Y. Muneoka and Y. Kanno. Effect of serum on the infiltration of dyes into FL cells. 31-35

K. Taguchi, H. Matsumura, M. Nakagaki, S. Kado, K. Takamura, T. Mochizuki, N. Miyoshi, J. Murashita, T. Maruyama, M. Matsumura, K. Niitani, S. Tagami and H. Iwamiya. Studies on an implantable assist and total heart system including a new conventional assisted circulation. 37-45

H. Imamura, N. Okamoto, Y. Satow, N. Hidaka and N. Akimoto. Closure of the ductus arteriosus in normal and malformed human heart. 47-59

K. Yoshikuni, S. Yamamoto, T. Yamura, D. Francis and M. W. Greaves. Characterization of diamine oxidase in cuinea-pig skin: increase of diamine oxidase activity at high temperature. 61-65

T. Fujii, M. Nishiki, O. Kodama, Y. Ogawa, K. Toishikawa and H. Ezaki. Method for simultaneous identification of T and B lymphocytes by permanent slide fixation. 67-74

N. M. Kajiwara. Inhibitory effect of D-mannosamine on the growth of D-glucosamine-requiring mutant strain of chinese hamster lung cells. 75-83

Vol. 27, No. 2, June, 1978

H. Yoshida, T. Nakajima, Y. Ueno, N. Koine, M. Onda, K. Ohe and A. Miyoshi. A simple and rapid screening method of amino acids and amines in biological samples. 85-92

M. Onda, A. Noguchi, K. Ohe, A. Miyoshi, H. Yoshida, Y. Ueno, N. Koine and T. Nakajima. Determination of tissue histamine and spermidine by means of high-performance liquid-chromatography. 93-97

K. Ueda, D. A. Robbins, K. Iitaka and C. C. Linnemann, Jr. Fatal rhabdomyolysis associated with parainfluenza type 3 infection. 99-103

O. Kodama, M. Kodama, T. Matsuyama, Y. Kato, Y. Ogawa, H. Ezaki and T. Nakazima. Effects of exogenous secretin on gastric secretion in rats. —Comparative study of crude and refined types of secretin—. 105-111

K. Onari, A. Seyama, T. Inamizu, N. Kodomari, M. Takaishi, N. Yorioka, T. Ikuta, K. Iwamoto, K. Sadamoto, M. Katsube, M. Yamakido and Y. Nishimoto. Immunological study on cigarette smokers. Part 1. Serum protein pattern in smokers. 113-118

K. Ohya, M. Nakayama, S. Yamamoto, T. Sumida, M. Kubota, Y. Murakami and I. Baba. Myelopathy due to ossification of the ligamentum flava of the thoracic spine—a report of two cases. 119-125

T. Watanabe and H. Saito. Replication of native and ultraviolet-irradiated herpes simplex virus in sublines derived from HeLa cells. 127-130

M. Ota, Y. Tsuji and T. Hoshita. Metabolism of bile acids VI. Metabolism of chenodeoxycholic acid in female rats. 131-138

M. Ota, Y. Tsuji and T. Hoshita. Metabolism of bile acid VII. Metabolism of ursodeoxycholic acid in female rats. 139–145
T. Kawamoto, G. Kajiyama, A. Maruhashi, T. Mizuno, K. Yamada, M. Fujiyama and A. Miyoshi. The influence of dietary cholesterol on the lithogenesity of bile in rats treated with clofibrate. 147–153

Vol. 27, No. 3, September, 1978

Y. Muneoka, Y. Shiba and Y. Kanno. Effect of propranolol on the relaxation of molluscan smooth muscle: possible inhibition of serotonin release. 155–161
Y. Muneoka, Y. Shiba and Y. Kanno. Effects of neuroleptic drugs on the relaxing action of various monoamines in molluscan smooth muscle. 163–171
M. Hiura and T. Fujii. Some electron microscopic observation on the histogenesis of the secondary interstitial gland in the mouse ovary. 173–180
Y. Kobayashi, S. Okahata, Y. Tanaka, K. Ueda and T. Usui. Erythrocyte superoxide dismutase activity in hemolytic uremic syndrome. 181–183
K. Inai, Y. Aoki and S. Tokuoka Endogenous peroxidase synthesis in rat uterine cells following the estrogen stimulation. 185–192
T. Tanaka. I-cell disease: effects of infection and prednisolone on lysosomal enzymes in leukocytes and blood plasma. 193–198
T. Tanaka and T. Sakatani. I-cell disease: ultrastructural study on inclusion bodies in lymphocytes. 199–202
Y. Kobayashi, S. Okahata, K. Tanabe and T. Usui. Evaluation of nitrite formation inhibition method in the determination of superoxide dismutase activity of human blood cells. 203–209
F. Ishibashi, K. Onari, T. Sato and R. Kawate. Studies on the mechanism of alloxan inhibition of glucose-induced insulin release. 211–219

Vol. 27, No. 4, December, 1978

M. Hiura, Y. Katsube, T. Fujii and A. Fujiwara. Ultrastructural and cytochemical studies on the cytodifferentiation of the primary interstitial gland in the immature mouse ovary. 221–226
Y. Kawamura and A. Ito. Difference in biologic status of normal liver and hepatoma implanted into chich embryo. 227–232
T. Onoda, N. Kajiwara and Y. Matsuo. Inhibitory effects of D-mannosamine and reversal of the D-mannosamine inhibition by D-glucosamine on growth of a glucosamine-requiring mutant of chinese hamster lung cells. 233–240
T. Sadatsune, M. Kuwabara, T. Watanabe and Y. Matsuo. Bacteriocin typing of enterococci. ... 241–246
S. Takizawa and F. Hirose. Modification of renal tumorigenesis by gonanal ablation in rats treated with N-butylnitrosourea or dimethylnitrosamine. 247–252
T. Tanaka. The different composition of eight lysosomal enzymes in human peripheral lymphocytes and granulocytes. 253–259
